

Solution for the Crypto Currency industry

Luxembourg, March 2015

PayCash Crypto Currency Services for the bitcoin industry

The existing E-Money-License of PayCash enables the company to serve the bitcoin industry on the part where fiat currency meets crypto currency.

Which part of the bitcoin value chain does PayCash cover with its services?

Actual business cases and bitcoin partners

- Part of the value chain: **Bitcoin exchanges**
- Run **Merchant Accounts** (pooled accounts or wallet system) and establish the connection between the “old” fiat currency world and the bitcoin eco system

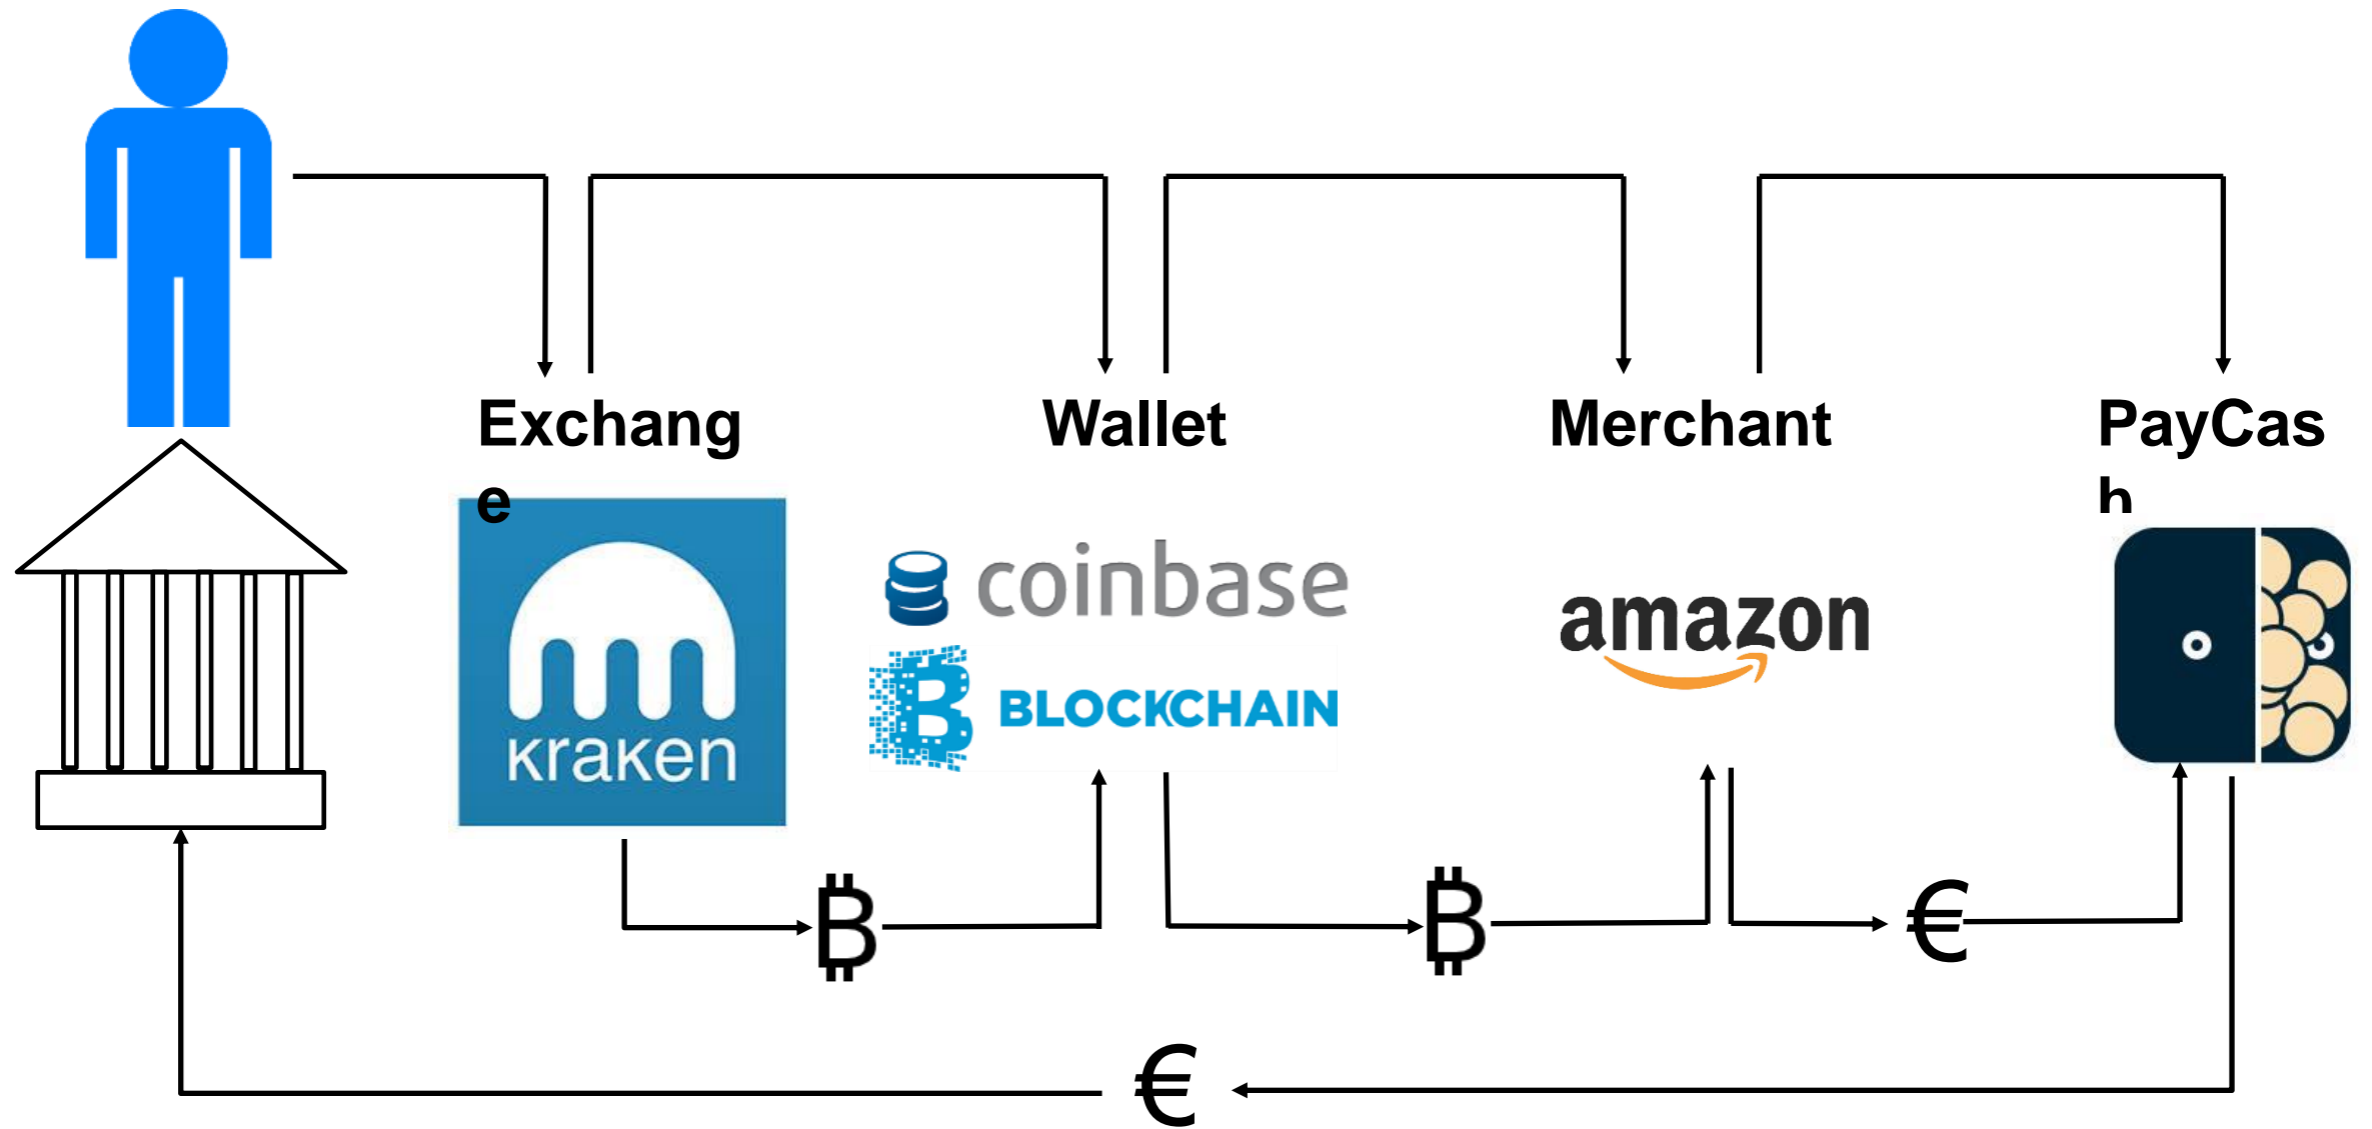

- **Merchant solutions / payment processor** for Bitcoin (all 28 EU states – fully complaint with EU regulation)
- On the **physical point of sale (offline)** (leveraging the existing network)
- Provide **online merchants** with bitcoin accepting services

Bitcoin Value Chain

Acceptance

Crypto Currency Solution from PayCash

We offer your company to accept Bitcoins in your shop.
Online and Offline

Online- and Offline

- Become next to Dell, Expedia, Holiday Inn and about 38,000 other companies a Bitcoin accepting merchant
- Seamless implementation into your online store
- The PayCash terminal enables you to accept Bitcoins also in your offline store at the PoS

Bitcoin payment process

- Customer pays with Bitcoins at the PoS
- PayCash enables the gateway to the Bitcoin exchange Kraken.com
- Kraken converts the Bitcoins into the fiat currency
- The merchant receives the fiat currency with the requested value and a receipt
