

Kliber

Full service Smartphone based digital recruitment tool.

Applicants reply to companies open positions by answering four questions using their smartphone

Each company chooses 4 questions linked to each open position

www.kliberapp.com

WHY ADOPT FOR FOR FULL KLIBER SERVICE?

For Recruiters

- **To gain considerable amount of time in the first selection phase**
- To benefit from efficient, easy and transparent feedback to the candidates by one click from the recruiter.
- Only receive applications of candidates who are engaged and motivated to apply for your company and for your specific position
- To get to know the candidates soft skills at the first phase selection phase
- To receive from the potential candidate a relevant and complete introduction package including: a personal content (4 answers to your chosen questions), a CV, a brief profile with essential information
- To avoid CV spamming (based on a piece of paper) and instead use KLIBER as an efficient filter for motivated candidates

HOW KLIBER IS DIFFERENT FOR CANDIDATES?

- The generation X is Smartphone fluent, using it as an every day communication tool for various matters. Generating a CV and sending it by email, is un-adapted to the modern way of staying in contact and connecting
- Kliber allows talented candidates to differentiate themselves and stick out of the crowd (- this is difficult in a batch of CVs even for the best candidate); it simply allows the candidate to be seen by the recruiter in the first selection phase, the candidate finally gets a direct contact to the recruiter without chasing her/him.
- The start-up communities are often looking for the right soft skills for a position, just like a shop or any client facing role. Highly technical profiles can be pinpointed immediately with the 4 questions. Kliber gives candidates the opportunity to shine
- Many applicants loose time chasing answers from recruiters. Kliber is transparent, a candidate can see when her/his application has been reviewed
